

LYMPHEDEMA CLINIC provides these services for you:

- Manual Lymph Drainage (MLD)
- Exercises
- Bandaging
- Proper Skin Care
- Compression Garments
- Education on the Lymphatic System
- Self-MLD and Bandaging Instruction

Lymphedema is the accumulation of lymphatic fluid in the interstitial tissue that causes swelling, most often in the arms or legs, and occasionally in other parts of the body. Lymphedema can develop when lymphatic vessels are missing or malformed, or when lymph vessels are damaged or removed. If left untreated, this stagnant fluid not only causes tissue channels to increase in size, but also reduces oxygen availability in the transport system, interferes with wound healing, and provides a culture medium for bacteria which can result in infection.

Call (517) 355-7648 to make an appointment.
